SUMMARY

Frontend & AI Engineer with 1+ year of production experience building high-performance React/Next.js applications and AI-powered products. Built and published PageChat, a RAG-based Chrome extension using LangChain and FastAPI. Winner of 7 global hackathons including EthIndia.

EXPERIENCE

Frontend Developer

Jan '25 – Jan '26

GlueX Protocol

- Built real-time DeFi portfolio dashboard in Next.js 16, displaying live positions across 10+ protocols — reduced load time by 40% via code splitting.
- Integrated TanStack Query for real-time data synchronization, reducing data loading times by 30% and improving application responsiveness.
- Implemented secure wallet management and seamless network switching using Privy and Wagmi v2, strengthening user security and overall experience.
- Redesigned the embeddable widget system, reducing bundle size by 25% and improving load time on 3rd-party integrations.

PROJECTS

PageChat — AI Chrome Extension

Feb '26 – Present

React.js, TypeScript, FastAPI, LangChain, FAISS, OpenAI API, Python

- Built and published a Chrome extension (MV3) that lets users chat with any webpage using a RAG pipeline.
- Backend: FastAPI + LangChain with FAISS vector store, RecursiveCharacterTextSplitter, and WebBaseLoader.
- Frontend: React + TypeScript content script injected into pages; chat history persisted per URL via chrome.storage.
- [Live on Chrome Web Store](#) [Github](#)

ZK-Insurance (Hackathon Winner — EthIndia'24)

Dec '24

Next.js, The Graph, ZK-Proofs, Solidity

- Built a privacy-preserving decentralized insurance platform using ZK-proofs and MPC, enabling secure claim verification without exposing user data
- Integrated **Anon Aadhaar** for secure identity verification and **The Graph** subgraphs for efficient data querying.
- Won **3rd Place Prize** from Privacy + Scaling Explorations **@EthIndia'24**.
- [Hackathon Project Link](#)

OneClickAuth (NPM Package)

Sep'24 - Sep'24

ReactJs, MongoDB, JavaScript, Redux-Toolkit, JWT

- Built and published an npm authentication package enabling plug-and-play JWT auth for React/Node apps
- Reduces auth setup from ~ 200 lines of boilerplate to a single import.
- Handles client routing, token refresh, and backend middleware.
- [Package Link](#)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

Frameworks: Next.js, React 19, FastAPI, LangChain, Tailwind CSS, Node.js

Web3 Libraries: Wagmi v2, Viem, Ethers.js, Privy, The Graph

AI & Tools: OpenAI API, FAISS, TanStack Query, Zustand, AWS Amplify, Git, PostHog, Framer Motion

EDUCATION

Indian Institute of Information Technology, Pune

2021-2025

B.Tech in Electronics and Communication Engineering

7.28 CGPA

ACHIEVEMENTS

- Won **7 global hackathons** including **EthIndia**, **Unfold**, and **MLH** events, competing against 500–2,000 teams per event.
- Published PageChat on Chrome Web Store, a production AI application, serving real users.
